SUMMARY

I am a software developer with experience in front-end and back-end development. I have a solid understanding of web technologies such as HTML, CSS, JavaScript and ReactJS. I also have experience in database management with MYSQL and MS-SQL. I am a self-starter with good communication skills and the ability to work in a team or independently. I am looking for opportunities to apply my technical skills and passion for software development to create innovative solutions.

EXPERIENCE

Front-end Developer

Valego Consulting, SRL

17 April 2023 – Actuality, Remote

- I developed the FrontEnd in several projects using ReactJS, which resulted in a significant improvement in efficiency and usability.
- I solved functional problems of the WebApps, improving the user experience.
- I managed IndexedDB with the DexieJS library to optimize application performance.
- I used API and WebSocket to integrate real-time functionality.

Back-end Developer

Webap, SRL

December 2020 – August 2021, Santo Domingo Oeste, RD

- I worked on the backend development of a web application called PortalPass (never launched), which allowed me to gain valuable experience in back-end development.
- I wrote, debugged and implemented the new updates needed for the project, which resulted in significant improvements in functionality.
- I wrote, debugged and implemented the new updates needed for the project, which resulted in significant improvements in functionality.
- I created the database in which the queries (CRUD) would be made from the diagrams provided by the project leader.
- I worked with AWS EC2 to create the server where the web would be hosted; this was with Windows server 2019 and using their IIS service.
